

Collaborating partners	JHPIEGO Ghana Health Service	 <p>The map shows the outline of Ghana with a grey fill. A black dot with a white center is located on the southern coast, labeled 'Accra'. The word 'Ghana' is written in bold black text above the map.</p>
Locations	Accra Amasaman Kumasi	
Purpose	To contribute to the evidence base on the single visit approach (SVA) as a feasible, effective, and sustainable means of secondary prevention of cervical cancer in developing countries.	
Project study period	2005-2007	
Key study questions or service-delivery strategy	<ol style="list-style-type: none"> 1. To assess program sustainability by evaluating how key Cervical Cancer Prevention Program (CECAP) indicators change over time, as funding from the Bill & Melinda Gates Foundation is withdrawn and replaced by local or other funding sources. 2. To determine how key quality assurance approaches implemented by CECAP in Ghana are being applied to maintain the quality of services. 3. To establish the extent to which providers maintain competence achieved during the initial training course. 	
Date results expected	July 2007
